1	Team Number	6							
2	Team Name	Winters							
3	First Name	Henry							
4	Last Name	Rotunno							
5	Avatar	henryr2							
6									
7	Dr. No.	Class Code	Class Name	Skills /earnings you'll implement into the project from this class taken in past					
8	1	15134267	Data Science Discovery	Python, pandas, working with dataframes, visualization					
9	2	21312207	Data Science Exploration	More python, more pandas, more visualizations					
10	3	15206	Intro to Database Concepts and Applications	Knowledge of SQL and graph databases					
11	4	C1124	Intro to Computer Science	Object oriented programming with java					
12	5	1053379	Intro to Geographic Information Systems	Mapping software, some python					
13	6	105380	Geographic Information Systems II	Further mapping software experience					
14	7	105381	Enterprise GIS	Experience with enterprise Postgres databases, SQL queries					
15	8	105473	Digital Cartography and Map Design	Web mapping with python, a bit of HTML/CSS					
16	9	105310	Computing in the Humanities	Python, github management, terminal practice					
17	10	10527	Concepts of Machine Learning	Scikit-learn machine learning, python					
18	11	105128	Intro to Computer Science II	Object oriented programming with C++					
19	12	105489	Programming for GIS	Lot of python with GIS applications, QGIS, methods, etc.					
20	13	15445	Data Visualization	Python data visualization with pandas, matplotlib.pyplot, altair, hosting sites with GitHub pages					
21	14	105316	Design of Usable Interfaces	Practice with wireframing, knowledge of defensive design					
22									
23			Not a class but I've made a mini portfolio	HTML/CSS, a little bit of JS. Embedding things

6									
7	St. No.	Class Code	Class Name	Skills / learnings you'll implement into the project from this class taken in past					
8	1	EPST 480	Educational Statistics	Using statistical methods to analyze data and make evidence-based decisions can be applied to evaluating AI models and web applications.					
9	2	EPST 580	Statistical Inference in Educ	Applying statistical reasoning can help evaluate AI systems and interpret data to make evidence-based decisions.					
10	3	EPST 581	Applied Regression Analysis	Regression concepts can support analyzing data, identifying relationships, and evaluating predictive models in AI applications.

7	St. No.	Class Code	Class Name	Skills / learnings you'll implement into the project from this class taken in past					
8		ECE 220	Computer Systems & Programming	C/C++ programming, debugging, data structures, and modular code design; useful for implementing and debugging backend logic.					
9		CS 101	Intro Computing: Engineering & Science	Python programming and basic data processing; useful for backend development, user/activity data handling, and scripting.					
10		MATH 213	Basic Discrete Mathematics	Sets, relations, graphs, and logical reasoning; useful for modeling relationships between users, activities, and joint requests.					
11		MATH 257	Linear Algebra with Computational Applications	Matrix/vector operations and computational problem solving; useful for future user-interest similarity or recommendation features.

7	Sr. No.	Class Code	Class Name	Skills / learnings you'll implement into the project from this class taken in past		
8	1	IS206	Intro Database Concepts & Apps	Learned to write and execute SQL queries, storing and organizing data, and perform database operations		
9	2	IS407	Introduction to Data Science	Analyze how social media affects mental health through thousands of samples, data visualization, statistics, data visualization		
10	3	IS457	Data Storytelling	Worked with local companies to fix data related concern, audience centered communication, community based decisions		
11	4	INFO415	Makespace: Open Studio	Prototyping, 3D printing, digital design		
12	5	INFO490	Advanced AI Web-Appls Development	Full-stack web application development, Python, Django, Jupyter, HTML		
13	6	IS390	Blockchain and Society	Cryptocurrency, decentralize systems, blockchain architecture, technological policy,		
14	7	IS401	Intro to Network Systems	Technology prototyping, circuits, Raspberry Pi, software and hardware integration, network configuration and troubleshooting

1	St. No.	First + Last Name	NetID	Peer's Expected Unique Contribution in the Project (These are separate from the default contribution mentioned in the instructions; The David P. Rosenblyum School of Engineering requires them all of all) Mapping technologies and support, HTML/CSS Backend development, Django database modeling, application logic, debugging, and Git/GitHub integration. Working on HTML, C++, SQL, and data mining related tasks that require to have big sample sizes. I can contribute to this project by using my academic and professional writing skills to effectively communicate the impact of this app to potential users. I am also skilled at connecting research findings to emphasize the importance and significance of our work.

1	Meeting Days and Times	Thursday: After class (3/4 group members) Wednesday: After 2 P.M. (3/4 group members) Saturday/Sunday: Willing to meet when needed Friday: (3/4) in the morning, (3/4) in afternoon								
2	Communication Platform	Groupchat on iMessages								
3	Agreed Response Time	within 12 hours								
4	Any agreed-upon rules for missed meetings or delays	If a group member needs to miss a meeting, they will need to notify the others in the group chat one day in advance or ASAP and still be communicative throughout								
5	Plan for assisting peer in case they struggles in implementing a skill	Ask ChatGPT first, if you still can't solve it, reach out to other group members ASAP.
